Kolkata, WB, India

## SUMMARY

Backend Engineer with 5+ years of experience building scalable systems using Python (FastAPI, Django), PostgreSQL, Redis, and AWS. Experienced in microservices, event-driven architecture, and asynchronous processing. Led key backend improvements including migration from MVC to layered architecture, modernization of API gateway infrastructure, and implementation of message-driven pipelines using RabbitMQ. Focused on designing reliable distributed systems and production-grade APIs.

## WORK EXPERIENCE

- Oct 2025 – Present  
SASTASUNDAR HEALTHBUDDY LIMITED  
Software Engineer
  - Design and maintain FastAPI microservices supporting core healthcare e-commerce workflows handling approximately 15k–25k API requests daily.
  - Refactored legacy Flask/FastAPI MVC services into a layered architecture (Models, Repositories, Schemas, Services, Routes, Dependencies) improving code maintainability and separation of concerns.
  - Implemented event-driven notification architecture using RabbitMQ, enabling asynchronous communication between services and improving system scalability.
  - Developed background processing pipelines using Celery and Redis to handle notification delivery and operational tasks.
  - Modernized API gateway infrastructure by migrating Node.js Express services to Fastify, improving performance and request throughput.
  - Optimized PostgreSQL queries and indexing strategies, reducing average API response time by approximately 30%.

## EDUCATION

### Integral University, Lucknow

Master of Computer Applications  
Expected 2027

### University of Calcutta

Bachelor of Science  
2016

## OPEN SOURCE PROJECTS

### VisScan

Resume parser built with FastAPI and OpenAI, extracting structured data using OCR, NLP, and semantic matching, with intelligent candidate-job relevance scoring.

### FastAPI Boilerplate

Production-ready FastAPI boilerplate with modular monolith architecture, unified responses, rate limiting, structured logging, and multi-database support for rapid backend development.

- Participate in AWS deployments (EC2, S3, RDS), monitoring system performance and resolving production issues.
- Collaborate with frontend, mobile, and infrastructure teams to deliver production features across distributed services.

Aug 2021 – Oct 2025

CENTRELOCUS (ESROT CONSULTING LABS)

### Python Developer

- Built and maintained RESTful APIs using Django, Django REST Framework, and FastAPI across multiple domains including e-commerce, healthcare (DICOM), agriculture, and crypto platforms.
- Developed AI-powered resume parsing pipelines integrating OpenAI APIs, OCR, and semantic search to extract structured candidate data.
- Designed backend services supporting asynchronous processing and event-driven workflows for scalable request handling.
- Implemented geolocation and real-time tracking systems for logistics and live mapping applications.
- Deployed backend systems on AWS (EC2, S3, RDS) with Docker-based containerization.
- Collaborated with cross-functional teams to define API contracts and improve system reliability across client projects.

### SKILLS

- Python
- FastAPI
- Django / Django REST Framework (DRF)
- JavaScript (Node.js)
- RESTful API Development
- Microservices Architecture
- Event-Driven Architecture
- Asynchronous Processing & Background Tasks
- PostgreSQL
- Redis / Celery
- AWS (EC2, S3, RDS, Route53)
- Docker
